## SHADES OF PASTEL

Pastel colors are considered springtime colors because of their delicate, subdued shades. Each color has meaning, and when combined, celebrate the rebirth of the spring season.

- Yellow is joy and happiness. It is the sun shining on a clear, spring day.
- Pink is a fresh beginning, a healthy new start, and playfulness.
- Blue is the color of the sky and water. It suggests peace and harmony. It is the clear blue sky and rain that brings forth the spring growth.
